Abstract:

Skills Czech republic is a non-profit organization dedicated to working with technically talented youth aged 17-23, organizes the competition "We are looking for the Czech champion in CNC milling". The winners are preparing to represent the Czech Republic in the international EuroSkills competition. Preparation for the national final of the competition is carried out under the guidance of professionals from practice. The finalists prepare a complex assignment: from the technical drawing to the production of the component.

To create the conditions for preparation for the international EuroSkills competition in cooperation with CzechSkills at the HKCR (national competition coordinator, awards nominations for the world competition)

Entry into the competition on the basis of qualification, the candidate for the final will submit a completed qualification protocol and a completed qualification piece. Based on the qualifying interviews, the top five will advance to the finals.

National finals in 2021, 2022, 2023. Starting the professional career of the contestants. International cooperation in preparation. The first ever Czech Republic representation at EuroSkills Gdansk 2023 in CNC milling. Jiří Hruška 10th place in Europe.

Martin Češka (Czech champion in CNC milling 2022) nominated for EuroSkills Hering 2025. Skills Czech Republik appointed as professional guarantor for CNC milling.
